OVA48523: the simplest way to a multifunction emergency lighting luminaire

All applications

Food processing

Cold environment

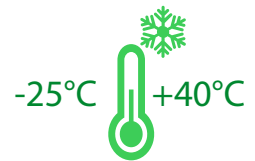

Refrigerated shelf

Innovative battery heater

The luminaire is able to self-regulate the temperature depending on the environmental condition from -25°C to $+40^{\circ}\text{C}$.

Right choice

Exiway Smartled can be used in stand alone mode or integrated in the 2 existing architectures: Exiway DiCube and Exiway Dali which allow the connectivity to EcoStruxure.

2 in 1 functionalities

Automatic tests compliant to EN 62034 with indication about tests results through LED signalling: green LED indicates normal operation, red LED indicates a fault.

Addressable (DiCube) mode by simply connecting the Dali bus to the Control Unit and embracing the ensuing advantages.

EcoStruxure™
Innovation At Every Level

Laser pointer testing

Main features

- ✓ Compliant with EN 60598-2-22, EN 62471 Group RG0
- ✓ High protection class IP65/IK07
- ✓ 400lm in emergency condition
- ✓ 1h autonomy with complete recharge in 12h
